

DO YOU HAVE WISHES?

I do. In fact I have so many of them that I wish that all of them came true. Do you wish that too? One of my wishes is to play a 5D game. I mean a game where we can be sucked in. It would be a miracle to see that come true. What is your most wanted wish to come true? Enjoy finding words related to wishes.

SLOW BIG BANG

I wish that the big bang explosion of the universe had not thrown the galaxies, star systems and planets so far away. This would have resulted in space travel for all possible.

By now we could have understood the universe better. The universe would have been an entirely different place to live. Imagine, if only we had four suns ten moons in the sky. We could have travelled to other planets where life is possible. We could have had alien friends (may be foes) by now. We could have understood black holes better.

I could have even sent my brother to a different planet while studying 😊 .

Aditya J, 5th Grade

TRAVEL TICKET

I wish I could travel to the past and future. If I could travel to the past, I would try to stop wars and correct mistakes, because every person needs a second chance. The Time travel machine rules says

you can't go more than 50 years in the past and 30 years in to the future. I got this idea from the book 'Time Machine' By H.G Wells. This would only happen if My Wish came true!!!!

Ambika B, 6th Grade

ROAD TO BETTER ROADS

I wish for an India that is unlike today's. I wish people would follow road rules sincerely, that there were wider roads and no honking. In India 45.678% of the deaths are from road accidents. There are many people who don't follow the rules. Many who actually follow the rules suffer because of indifference from people who do not care. When India becomes a HIC (High Income Country), there will be more funds to fix the roads. This will remain a dream unless we wish for it to come true and work hard for it.

In the next issue >>>

Did you ever wonder where stories come from? Some are just dreams. But others really happen around you all the time. You must just have the open eyes or mind, and the right feeling in your heart to see and understand the stories.

STORY TIME!

WISH LIST

- I wish youngsters are allowed to drive vehicles but with safety instructions, because nowadays Youngsters drive vehicles very fast.
- I wish dreams come true. e.g.: I dream of becoming a pilot the next day, or driving a plane tomorrow.
- I wish we have clean cities, so that disease free cities are ensured.
- I wish to have a corruption free world. I wish to root out corruption before it roots on me.
- I wish to talk to people boldly, without any fear.

Kamal R, 10th Grade

ANIMAL KINGDOM

I love animals and wish to have the power to talk to them. I want to know their feelings because some people don't treat animals well. I can help them if I knew what they felt. If all the animals could talk to humans the whole world would be happy as most of the living things are happy. Many people don't realize that animals are also living things just like us and have a life and have their own feelings. These are the people who don't treat animals properly. Since we are on top of the Social Animal list we tend to dominate with cruelty. So let us strive to help the animal world and I request all the people who are reading this newsletter to be against animal cruelty and help the Animal World.

I WISH...

1 DECEMBER 2014

Weekly dose of positivity and inspiration

I AM WOW!

Wish it.
Dream it.
Do it.

Current issue OUR WISHES AND DREAMS

WINGS TO MY WISH

I wish I could go high up in the sky flapping my hands like a bird that can fly. Flapping my hands and flying would keep me fit and trim. When I fly in the sky, I would touch the pretty rainbow and I would wave to the people in aircrafts. Flying can be useful to avoid road traffic and reach the destination faster. There is only one problem with this wish - the birds may get scared.

Ganesh, 5th Grade

TIME IN-TIME OUT

I wish that I can stop time with my mind. I want to not just stop but make time go faster, slower and as well as through time. I would stop time so I sleep for a lot longer. I will slow down time so that I can win races and competitions easily. I can play on my XBOX forever without anyone asking me to stop.

I can also go back in time and meet famous people like Hitler, Mahatma Gandhi, JFK, and Winston Churchill. I can also go into the Future to see my future self and correct my past mistakes to prevent me from doing them. I could see my future life and job, look at how rich I'll be and the future technologies.

Yeshwant Dasari, 8th Grade

CRAZY CHOCOLATES

I wish for a small box with a green button. When the button is pressed the room around should spin in to a world of chocolates. Chocolates everywhere, to eat, to take and to play. All different types of chocolates for free, imagine how it would be. I wish my wish will come true.

Gayathri R, 7th Grade

MY WISH - MY ENVIRONMENT

If I could wish for something that would have a huge impact on our everyday life, I'd wish for a teleporting machine everywhere. People can go into the machine, select the continent, country, up to the exact machine they want to come out of; and then they can choose teleport travel instantly. People could travel long distances instantly, and can save the travel time. For example, people can instantly go on trips instead of planning for the journey (or) they can instantly travel from one country to another, instead of spending lots of time on flights. Just imagine, at the close of school, we can reach home the very next instant!

Pollution can be prevented; as cars, planes, ships and trains won't be there to produce harmful smoke. In the existing modes of transport, carbon-monoxide, methane and many other harmful fumes are released into the air (that can be prevented by using teleports). People do not have to pay for the tickets (flight ticket, train ticket, bus ticket, etc.), running expenses (car petrol, service, etc.). For private home machines people have to pay for the annual service (once a year) and of course, for buying the machine.

People can use public machines for free (no service required). But they have to pay for the capital and revenue expenses (by taxes). One important benefit of this system would be that the non-renewable sources of energy can be preserved (we don't need any fuels like petrol, diesel, etc.; we only need electricity).

Tejas, 5th Grade

WISH WITH YOUR BRAIN

Three men are trapped on an island. They find a genie's lamp and agree they will each get a wish. The first man wishes he was 25% smarter, then he swims off the island. The second man wishes he was 50% smarter, then he cut down the tree, made a boat, and rowed off the island. The third man wished he was 100% smarter, then he flew in a chopper.
